- **4,645** Checkout Receipts
- **35,967** Units Sold
- **99** Registered Businesses
- **₦1.3M / Day** Sales Velocity

Presenter: Bello Imam & Engineering Team

Platform: Desktop (Tauri Rust), Android (PWA), Cloud Portal

THE MARKET CHALLENGE

The SME Dilemma in Nigeria

Informal Retail Powers Nigeria's Economy, but Operates Blind, Vulnerable & Unbanked

01 The "Fake Alert" Crisis

- **70%+ of retail checkout** in Nigeria is conducted via direct bank transfers.
- Merchants lose millions to **counterfeit SMS alerts**, photoshopped transfer screenshots, and cashier collusion.
- Cashiers stall checkout queues waiting for alerts on the store owner's personal phone.
- No automated link between bank transfers and cash register tills.

02 The Offline Reality

- Frequent telecom network dropouts and power cuts paralyze standard cloud-only POS systems.
- When the internet drops, checkout grinds to a halt—forcing manual paper receipts or lost customers.
- Heavy web POS apps crash on low-spec counter PCs and budget Android phones.

03 The "Invisible" Merchant

- Over **95% of informal retailers** keep fragmented or unverified financial records.
- **Zenith Bank cannot safely underwrite them:** No audited books, no clean transaction history, no visibility on stock velocity.
- Banks miss lucrative SME lending margins; retailers stay starved of working capital.

Zeneva: The Local-First Retail OS

Unifying Native Point-of-Sale, Zero-Fraud Virtual Terminals, and Predictive AI

Local-First Architecture (Sub-10ms)

Built with **Tauri 2.0 (Rust)** and Next.js 15. Runs with a tiny 25MB footprint on Windows desktop, tablets, and Android.

- **100% Offline Functional:** Local SQLite mirror records checkout sales instantly with zero internet.
- **Automatic Background Sync:** Silently syncs to Cloud Firestore when connectivity restores. No cashier interruption.

Virtual POS: Instant Transfer Confirmation

Dedicated virtual transfer accounts provisioned per store with real-time webhook confirmation.

- **Instant Settlement:** Real-time webhook captures customer transfers within 1.5 seconds.
- **Audible Cashier Chime:** Loud audio alert & visual badge confirm receipt on the counter.
- **Auto-Reconciliation:** Pending receipts flip automatically to "Paid" and print instantly. Fake alerts are mathematically impossible.

Owner Privacy & Anti-Theft Protection

- Cashiers confirm transfer receipts on the POS terminal **without viewing the owner's master bank account balance**.
- Forensic audit trails log every void, discount override, and cart change to eradicate employee theft.

Zen AI Predictive Analytics

- Powered by **Google GenAI & Genkit** with 41 specialized business data tools.
- Diagnoses "trapped capital" in dead stock, automates reorder thresholds, and flags margin erosion before cash flow collapses.

LIVE TRACTION

Proven Market Traction (Not an Idea)

Live in Production with ₦307M+ in Audited Retail Commerce

₦307.1M
PLATFORM GMV
Processed through Zeneva cash registers

4,645
TOTAL RECEIPTS
Generated across physical checkouts

35,967
UNITS SOLD
Physical goods rung up by merchants

₦1.30M
DAILY VELOCITY
Platform sales momentum per 24 hours

Anchor Merchant #1

Safeway Dermatology

₦198,130,778 GMV

1,067 active SKU variants. Multi-staff clinic and retail counter running daily operations on Zeneva desktop.

Anchor Merchant #2

Uv Electric Ltd

₦100,141,000 GMV

154 high-value industrial equipment and electrical SKUs. Continuous invoicing and counter checkouts.

Device Ecosystem

48.7% Native App

48 PC / 13 Mobile / 60 Web

Merchants with installed Windows desktop apps log **3.8× more daily transactions** than web-only visitors, driving high retention.

UNDER THE HOOD

Industrial Resilience & Fraud Prevention

Engineered for Sub-10ms Speed, Cryptographic Security & Financial Integrity

Offline-First Sync & Cryptographic Vault

- **Local SQLite (@tauri-apps/plugin-sql):** Mirrors catalog, customer, and receipt ledgers locally.
- **Rust Stronghold Vault:** Offline transaction tokens and business credentials encrypted in OS hardware-backed memory.
- **Cache Tenancy Seal:** Multi-tenant isolation verified by pos_cache_owner_business_id to prevent cross-account cache leakage.

HMAC-SHA512 Webhook Reconciliation Engine

- **Constant-Time Verification:** crypto.timingSafeEqual prevents timing-attack spoofing on payment webhooks.
- **Sub-Second POS Matching:** Ingested transfers instantly locate matching pending receipts by amount and reference, marking them "Paid" in real time.
- **Zero Cashier Account Access:** Protects store owners while removing checkout bottlenecks.

Real-Time Forensic Anomaly Engine

- **forensics.ts Scanner:** Evaluates cart actions against heuristic threat rules.
- Flags abnormal void frequencies, suspicious cost-price overrides, and off-hour sales patterns to detect internal retail embezzlement.

Business Health Index (BHI)

- Continuous telemetry calculations in business-rating.ts: Sales consistency, margin discipline, and inventory turnover.
- Turns raw unstructured retail operations into a tamper-evident credit rating score ready for banking underwriting.

STRATEGIC VALUE PROPOSITION

How Zenith Bank Wins with Zeneva

A Direct Trojan Horse into Grassroots SME Deposits & Zero-Risk Credit Underwriting

01 Low-Cost Deposit Mobilization (CASA)

Every retail merchant onboarded onto Zeneva is automatically provisioned with a **Zenith Bank Corporate / Collection Account**.

- All store collections (cash, cards, and bank transfers) flow directly into Zenith Bank accounts.
- Mobilizes hundreds of millions of Naira in sticky, low-cost operating float away from digital fintechs.

02 Direct Merchant Acquiring Expansion

Integrate **Zenith Bank NIP Rails** directly into Zeneva's Virtual POS.

- Zenith Bank earns transaction and processing fees on every retail transfer rung up across our merchants.
- Replaces generic fintech subaccounts with native Zenith payment acquiring rails.

03 Automated, Zero-Collateral SME Underwriting

Zenith Bank can safely deploy credit using Zeneva's **Business Health Index (BHI)**.

- Disburse **1-click inventory restocking loans** directly inside the POS when stock runs low.
- Repayments are deducted automatically from incoming daily store GMV, ensuring virtually zero non-performing loans (NPLs).

04 Elimination of the "Fake Alert" Epidemic

Zenith Bank becomes the standard of trust for retail checkouts across Nigeria.

- Instant cryptographic settlement confirmation protects merchants from fraudulent alerts and screenshots.
- Solidifies merchant loyalty to Zenith Bank's commercial network.

COMMERCIAL MODEL

Business Model & Unit Economics

Multi-Tiered Revenue Model Built on Software SaaS, Payments & Financial Services

SaaS Subscriptions

Recurring MRR

Tiered subscription plans (Starter: Free / Pro: ₦8,500/mo / Business: ₦25,000/mo) for multi-branch sync and advanced AI inventory forecasts.

Payment Revenue

0.5% – 1% Fee

Transaction processing fee on every dedicated Virtual POS transfer confirmation and payment gateway settlement.

Lending Origination

1.5% – 2.5%

Loan origination and credit distribution commission shared with Zenith Bank on disbursed working capital and inventory restocking loans.

Hardware Packages

₦65k – ₦150k

Bundled sales of thermal receipt printers, wireless barcode scanners, and pre-configured counter workstations.

High Merchant Stickiness & LTV

Once a retailer digitizes their catalog (1,000+ SKUs) and links daily staff workflows to Zeneva, switching costs are exceptionally high. Native desktop merchants demonstrate a **3.8× higher daily transaction frequency**, yielding long customer lifespans.

₦56,000+

AVERAGE ESTIMATED LTV

THE PATH AHEAD

Roadmap & The Partnership Ask

Scaling from ₦307M GMV to ₦5B+ in Annual Commercial Flow with Zenith Bank

Execution Roadmap

- **Q1 2027 (Next 3 Months):** Direct Zenith Bank NIP API integration. Enable automated corporate account opening from Zeneva's onboarding screen.
- **Q2 2027 (Next 6 Months):** Pilot embedded inventory restocking loans for top 25 high-velocity merchants with automated daily GMV deductions.
- **Q3–Q4 2027 (Next 12 Months):** Scale to 5,000 active retail merchants across Lagos, Ibadan, Abuja, and Port Harcourt, driving over ₦10B in annualized Zenith processing volume.

The Ask from Zenith Bank

- **Incubator & Accelerator Acceptance:** Selection into the Zenith Bank / Beyond Limits Acceleration Cohort.
- **Core Banking & NIP Sandbox Access:** Direct API partnership for virtual account generation, instant webhook settlements, and automated account opening.
- **Commercial Pilot Partnership:** Co-branding Zeneva as Zenith Bank's preferred smart retail POS for emerging SME customers.
- **Executive Mentorship:** Direct guidance from Zenith Bank's SME Banking & Digital Payments leadership.
